

UPR 2015-2017 Mustang Front Pony Emblem Installation & Removal Tips

(UPR Tips to ensure professional results)

Removing the factory emblems to install NEW emblems and give your Mustang a brand new look is without a doubt one of the most rewarding exterior upgrades available. Or the best way to set your car apart from just another off the showroom floor FORD Mustang.

The correct process to remove and install Pony emblems from your Mustang.

Step 1 - To safely remove the emblem you will need to pop the hood and remove all 8 push pins from the factory radiator cover.

(You will have to take your time to neatly lift all the pins with a flat head screwdriver)

Step 2 - Once you remove the factory radiator cover you can see down into the area where the emblem tabs are located. Just find the four tabs one at the head one at the tail and one where the feet cross and one right above that.

(You can break the tabs off of the back side holding the pony in place with your hand)

Step 3 - Use rubbing alcohol and be sure to clean the mounting location surface before installing your new Pony emblem.

Step 4 - Now making sure the adhesive is securely in place before installing your emblem by lining it up with the edge as desired before your final application

Step 5 - Now make sure the alignment is where you want it and remove the adhesive backing and press and hold it firmly in place for 1 minute.

(To remove any imperfections from the emblem surface you simply wax and wipe the emblem down)

- **UPR emblem maintenance tips**

Always, be sure to use the same wax you use on your Mustang painted surface to wax and maintain the painted surface of your Mustang emblem. **(Not required for matte colors)**

- **Most important step for a perfect finish**

During handling, shipping and installation these emblems can get superficial marks that will need to be wiped off by waxing the emblems as a last step to finalize the installation.
